

MINISTRY OF PRIMARY AND SECONDARY EDUCATION

AGRICULTURE

JUNIOR (GRADE 3-7) SYLLABUS

(2015 - 2022)

**Curriculum Development and Technical Services,
P.O. Box MP 133, Mount Pleasant, Harare**

ACKNOWLEDGEMENTS

The Ministry of Primary and Secondary Education wishes to acknowledge the following for their valued contribution in the production of this syllabus:

- Panellists for Junior School Agriculture
- Ministry of Higher and Tertiary Education Science and Technology Development
Belvedere Technical Teachers College and Seke Teacher's College
- Zimbabwe School Examinations Council (ZIMSEC)
- University of Zimbabwe: Department of Technical Education
- Publishers
- United Nations Children's Fund (UNICEF)
- United Nations Educational Scientific Cultural Organisation (UNESCO)

1.0 PREAMBLE

1.1 Introduction

Junior School Agriculture is a science learning area that involves theory and practical activities in soil, water, plant and animal management, farm tools and machinery use as well as Agri-business. This five year learning phase (Grade 3-7) will provide learners with opportunities to identify, investigate, solve problems, carry out agricultural activities and assess their viability in a sustainable manner. The learning phase will see learners being assessed through continuous assessment and summative examination.

1.2 Rationale

Zimbabwe's economy is agro based, therefore it is imperative that learners in their diversity acquire necessary agricultural knowledge, skills and positive attitudes at grass root level. This would enable learners to be proactive, fit well in the community and national economy, value the dignity of labour and harness available opportunities for enterprise.

1.3 Summary of Content

The Junior School Agriculture Syllabus will cover theory and practical activities in areas such as soil, water, plant and animal management, farm tools and machinery and Agri-business. This five year learning phase seeks to develop skills in sustainable soil and water management as well as production and maintenance of agricultural produce. The syllabus will help learners to acquire marketing and value addition skills.

1.4 Assumptions

It is assumed that learners know:

- various plants and animals
- how to conduct practical activities such as weeding, digging and watering
- how to use basic tools such as hoes, slashers and wheelbarrows

- that buying and selling of agricultural produce take place
- that resources such as land, tools and equipment are available for use

1.5 Cross-Cutting Themes

This phase will develop in learners, an appreciation of:

- Safety
- Health issues
- Food security
- Technology
- Environmental issues
- Disaster risk management
- Financial literacy
- Heritage

2.0 PRESENTATION OF SYLLABUS

The Junior Agriculture Syllabus is a single document covering grades 3 to 7. It contains the preamble, aims, assessment, syllabus topics, scope and sequence. The syllabus also contains content matrix for all junior grades. The scope and sequence chart shows progression of topics from grade 3 to 7, while the syllabus matrix gives details of the content to be covered. The syllabus also suggests a list of resources to be used during learning and teaching.

3.0 AIMS

The syllabus aims to help learners to:

- appreciate the importance of agriculture to the individual, family, community and country

- develop a positive attitude towards Agriculture and its study as a science
- develop environmental awareness and actively participate in conservation projects within the school and in their community
- acquire and use scientific knowledge in managing agricultural activities sustainably
- develop agricultural business skills in running agriculture as an enterprise
- develop innovativeness in agricultural practices including value addition
- contribute to the improvement of community nutritional needs, food security and socio-economic development of the country

4.0 SYLLABUS OBJECTIVES

By the end of this learning phase learners should be able to:

- relate the importance of agriculture to socio-economic development of the family, community and country
- use scientific principles, skills and sustainable agricultural practices to solve agricultural challenges in their communities
- apply indigenous knowledge, scientific principles and new technology to improve agricultural production
- relate the environment and climatic conditions to agricultural activities
- choose appropriate equipment, materials and methods for a specific process and use them safely
- use local materials and knowledge to design agricultural tools
- apply agricultural principles to improve their livelihoods
- record and evaluate given agricultural activities
- identify markets and sell their produce profitably

5.0 METHODOLOGY AND TIME ALLOCATION

Methodology

Learner centred and hands on approaches should be used in the development of concepts and skills. These approaches encourage curiosity and promote practical orientated learning whereby learners apply their experiences, knowledge, skills and attitudes independently. Linkage between theory and practice is strongly recommended in the teaching of agriculture. The following are suggested methods of teaching and learning agriculture:

- Project based learning
- Educational tours
- E-learning
- Experimentation
- Problem solving
- Discovery method
- Collections
- Demonstrations
- Debate
- Discussions
- Design based learning
- Dramatization
- Case studies
- Gallery walk
- Resource person(s)
- Simulations
- Role Play
- Song and Dance
- Survey

NB. The above suggested methods should be enhanced by the application of orthodidactic principles and multi-sensory approaches to teaching. These include tactility, concreteness, individualisation, self-activity, totality and wholeness. Teachers are encouraged to address the learners' residual senses

Time Allocation

Eight periods of thirty minutes per week, with two double lessons for practical, should be allocated for adequate coverage of the syllabus.

6.0 TOPICS

6.1 Introduction to agriculture

6.2 Climate and land use

6.3 Soil

6.4 Water

6.5 Plants

6.6 Animals

6.7 Farm implements and machinery

6.8 Agri-business

6.0 SCOPE AND SEQUENCE

6.1 TOPIC 1: INTRODUCTION TO AGRICULTURE

TOPIC	GRADE 3	GRADE 4	GRADE 5	GRADE 6	GRADE 7
Importance of Agriculture	<ul style="list-style-type: none"> • Definition of agriculture • Importance of agriculture to the family 	<ul style="list-style-type: none"> • Importance of agriculture to the community and nation 	<ul style="list-style-type: none"> • Importance of agriculture to the community and nation 	<ul style="list-style-type: none"> • Branches of agriculture: <ul style="list-style-type: none"> - Crop production - Animal production - Soil science - Agricultural engineering - Agricultural economics - Horticulture - Forestry and Wildlife 	<ul style="list-style-type: none"> • Career opportunities in agriculture • Types of agriculture in Zimbabwe: <ul style="list-style-type: none"> - Mixed farming - Specialised farming - Diversified farming • Farming systems: <ul style="list-style-type: none"> - Shifting Subsistence - Commercial - Irrigation farming in Zimbabwe - Land reform
Farm tools	<ul style="list-style-type: none"> • Garden tools and their uses • Models of garden tools 	<ul style="list-style-type: none"> • Farm tools and their uses • Designs of garden tools 	<ul style="list-style-type: none"> • Classification of farm tools 	<ul style="list-style-type: none"> • Maintenance of farm tools <ul style="list-style-type: none"> - Storage facilities - Model of a tool rack 	<ul style="list-style-type: none"> • Design and Construction of tool racks
Safety in agriculture	<ul style="list-style-type: none"> • Safe use of garden tools 	<ul style="list-style-type: none"> • Common hazards in agriculture 	<ul style="list-style-type: none"> • Safe use of farm tools and implements 	<ul style="list-style-type: none"> • Safe use of agro-chemicals 	<ul style="list-style-type: none"> • Safe storage and disposal of agro chemicals

6.2 TOPIC 2: CLIMATE AND LAND USE

TOPIC	GRADE 3	GRADE 4	GRADE 5	GRADE 6	GRADE 7
Climate	<ul style="list-style-type: none"> • Seasons of Zimbabwe 	<ul style="list-style-type: none"> • Seasons of Zimbabwe and related agricultural activities 	<ul style="list-style-type: none"> • Weather • Influence of weather on agricultural activities 	<ul style="list-style-type: none"> • Climate regions in Zimbabwe • Natural farming 	<ul style="list-style-type: none"> • Agriculture and climate change • Characteristics of natural farming regions in Zimbabwe • Agricultural activities in each natural farming region in Zimbabwe

6.3 TOPIC 3: SOIL

TOPIC	GRADE 3	GRADE 4	GRADE 5	GRADE 6	GRADE 7
Soil composition		<ul style="list-style-type: none"> • Soil components 	<ul style="list-style-type: none"> • Percentages of soil components 	<ul style="list-style-type: none"> • Functions of: - soil mineral matter - soil water - soil air - soil organic matter 	<ul style="list-style-type: none"> • Importance of living organisms in the soil
Soil formation	<ul style="list-style-type: none"> • Rocks break 	<ul style="list-style-type: none"> • Rocks break to form soil 	<ul style="list-style-type: none"> • Different rocks break to form different types soils 	<ul style="list-style-type: none"> • Weathering • Weathering agents 	<ul style="list-style-type: none"> • Types of weathering: - physical - biological - chemical
Soil types	<ul style="list-style-type: none"> • Local soils 	<ul style="list-style-type: none"> • Soil types: - clay - loam sand 	<ul style="list-style-type: none"> • Soil particle sizes 	<ul style="list-style-type: none"> • Properties of soil 	<ul style="list-style-type: none"> • Soil texture and soil structure

TOPIC	GRADE 3	GRADE 4	GRADE 5	GRADE 6	GRADE 7
Soil profile				<ul style="list-style-type: none"> • Layers of the soil profile <ul style="list-style-type: none"> - Top soil - sub soil - Gravel - Parent rock • Characteristics of each layer 	<ul style="list-style-type: none"> • Layers of the soil profile <ul style="list-style-type: none"> - Top soil - sub soil - Gravel - Parent rock • Characteristics of each layer
Soil fertility	<ul style="list-style-type: none"> • Compost making 	<ul style="list-style-type: none"> • Soil fertility 	<ul style="list-style-type: none"> • Soil nutrients <ul style="list-style-type: none"> - nitrogen (N) - phosphorous(P) - potassium(K) • Types of fertilisers <ul style="list-style-type: none"> - organic and inorganic 	<ul style="list-style-type: none"> • Sources of organic fertilisers <ul style="list-style-type: none"> • liquid manure - materials -preparation -management 	<ul style="list-style-type: none"> • Management of soil fertility
Soil erosion		<ul style="list-style-type: none"> • Causes of soil erosion 	<ul style="list-style-type: none"> • Agents of soil erosion: <ul style="list-style-type: none"> - running water -wind -animals • types of soil erosion 	<ul style="list-style-type: none"> • Effects of soil erosion 	<ul style="list-style-type: none"> • Soil conservation
Soil pollution					<ul style="list-style-type: none"> • Control of soil pollution • Sources of soil pollution • Effects of soil pollution

6.4 TOPIC 4: WATER

	<ul style="list-style-type: none"> • Uses of water 	<ul style="list-style-type: none"> • Importance of water • Sources of water 	<ul style="list-style-type: none"> • Water harvesting • Water storage • Methods of conserving water 	<ul style="list-style-type: none"> • Soil moisture conservation methods 	<ul style="list-style-type: none"> • Water cycle
				<ul style="list-style-type: none"> • Water pollution • Causes and effects of water pollution 	<ul style="list-style-type: none"> • Measures to control water pollution

6.5 TOPIC 5: PLANTS

	<ul style="list-style-type: none"> • Plants within the local environment 	<ul style="list-style-type: none"> • Uses of plants: -cultivated and wild plants 	<ul style="list-style-type: none"> • Classification of plants and types of plants 	<ul style="list-style-type: none"> • Plant parts: - leaf - stem - flowers - roots 	<ul style="list-style-type: none"> • Functions of plant parts
	<ul style="list-style-type: none"> • Local organic sources of plant nutrients 	<ul style="list-style-type: none"> • Inorganic sources of plant nutrients 	<ul style="list-style-type: none"> • Major plant nutrients • Minor plant nutrients -boron -sulphur -zinc 	<ul style="list-style-type: none"> • Importance of major plant nutrients • Importance of minor plant nutrients -nitrogen(N) -phosphorous(P) -potassium (K) 	<ul style="list-style-type: none"> • Nutrients deficiency symptoms: lack of

TOPIC	GRADE 3	GRADE 4	GRADE 5	GRADE 6	GRADE 7
Vegetable crops	<ul style="list-style-type: none"> • Local vegetables 	<ul style="list-style-type: none"> • Classes of vegetable crops • Growing leaf vegetables • Marketing of vegetables 	<ul style="list-style-type: none"> • Nutritional value of vegetables • Growing root vegetables • Marketing of vegetables 	<ul style="list-style-type: none"> • Growing fruit and legume vegetables • vegetable diseases and pests • marketing of vegetables 	<ul style="list-style-type: none"> • Vegetable crop rotation • processing and marketing of vegetable crops
Field crops	<ul style="list-style-type: none"> • Local field crops 	<ul style="list-style-type: none"> • Types of field crops 	<ul style="list-style-type: none"> • Value of field crops • Growing a field legume crop 	<ul style="list-style-type: none"> • Growing of cereal crops • Diseases and pests of the cereal crops 	<ul style="list-style-type: none"> • Field crops rotation • Care and harvesting of a cereal crop • processing and marketing of field crops
Orchard/fruit trees	<ul style="list-style-type: none"> • Local fruit trees 	<ul style="list-style-type: none"> • Importance of fruit trees • Indigenous and exotic fruit trees 	<ul style="list-style-type: none"> • Establishing a nursery • Marketing of fruit tree seedlings 	<ul style="list-style-type: none"> • Orchard site • Site preparation and planting 	<ul style="list-style-type: none"> • Management of fruit trees • Processing and marketing of fruits
Ornamental horticulture	<ul style="list-style-type: none"> • Ornamental plants 	<ul style="list-style-type: none"> • Importance of ornamental plants 	<ul style="list-style-type: none"> • Establishment of flower beds • Marketing of flowers 	<ul style="list-style-type: none"> • Establishment of lawns • Marketing of lawns 	<ul style="list-style-type: none"> • Establishment of decorative shrubs • Marketing of decorative shrubs
Forestry	<ul style="list-style-type: none"> • Uses of trees 	<ul style="list-style-type: none"> • Importance of trees • Indigenous and exotic trees 	<ul style="list-style-type: none"> • Management of a nursery • Marketing of nursery products 	<ul style="list-style-type: none"> • Woodlot sites • Land preparation • Planting trees 	<ul style="list-style-type: none"> • Care and management of trees • Afforestation and deforestation
Plant protection		<ul style="list-style-type: none"> • Causes of plant damage 	<ul style="list-style-type: none"> • Effects of animals, drought and veld fires on crops • Methods of controlling crop damage 	<ul style="list-style-type: none"> • Pests and weeds • effects of pests and weeds • Control of pests and weeds 	<ul style="list-style-type: none"> • Causes of plant diseases • Control of diseases

6.6 TOPIC 6: ANIMALS

TOPIC	GRADE 3	GRADE 4	GRADE 5	GRADE 6	GRADE 7
Introduction to animal study	• Uses of domestic animals	• Types of animals: -domestic and wild animals	• Uses of animals in agriculture: - wild and domesticated	• Poultry or rabbit products and by products • Poultry or rabbit housing	• Care of animals • Animal management systems
Animal nutrition	• Animal feeds	• Essential nutrients for normal animal growth	• Sources of essential nutrients	• Balanced diet • Functions of essential nutrients	• Nutrient deficiency symptoms and correction
Small livestock production (poultry or rabbits)	• Types of small livestock e.g. poultry or rabbits	• Importance of small livestock -housing systems and requirements -feeding and caring	• Rearing small livestock: -housing systems and requirements -feeding and caring	• Control of parasites and diseases of small livestock: poultry or rabbits	• marketing of: -poultry or rabbits -products and by products of poultry or rabbits
Apiculture	• Characteristics of bees	• Importance of bee keeping • Bee colony	• Types of bee hives	• Construction of bee hives	• Management of bees • Processing and marketing of honey and by products

6.7 TOPIC 7: FARM IMPLEMENTS AND MACHINERY

TOPIC	GRADE 3	GRADE 4	GRADE 5	GRADE 6	GRADE 7
Farm implements and machinery	<ul style="list-style-type: none"> Types of farm implements 	<ul style="list-style-type: none"> Types of farm machinery 	<ul style="list-style-type: none"> Uses of farm implements 	<ul style="list-style-type: none"> Uses of farm machinery Classification of farm machinery 	<ul style="list-style-type: none"> Maintenance and storage of farm implements and machinery Inventory of implements and machinery Design and construction of Appropriate technology

6.8 TOPIC 8: AGRI BUSINESS

TOPIC	GRADE 3	GRADE 4	GRADE 5	GRADE 6	GRADE 7
Agri business	<ul style="list-style-type: none"> local agricultural products 	<ul style="list-style-type: none"> local markets and retail markets 	<ul style="list-style-type: none"> Financial records Production records 	<ul style="list-style-type: none"> National markets Income and expenditure 	<ul style="list-style-type: none"> Enterprise budget Profit and loss account

7.0 COMPENTANCE MATRIX

7.1 GRADE 3 TOPIC 1: INTRODUCTION TO AGRICULTURE

TOPIC	OBJECTIVES Learners should be able to:	CONTENT	SUGGESTED NOTES AND ACTIVITIES	SUGGESTED RESOURCES
Importance of Agriculture	•	• • •	• • • • •	• • • • •
Farm Tools	•	• •	• • •	• • •
Safety in Agriculture	•	•	•	•

7.2 GRADE 3 TOPIC 2: CLIMATE AND LAND USE

TOPIC	OBJECTIVES Learners should be able to:	CONTENT	SUGGESTED NOTES AND ACTIVITIES	SUGGESTED RESOURCES
Climate	<ul style="list-style-type: none"> • identify the seasons of Zimbabwe • state the months that fall under each season • identify signs from their local environment that indicate seasons 	<ul style="list-style-type: none"> • Seasons of Zimbabwe: <ul style="list-style-type: none"> - Rain season - Post rain season - Cool dry season - Hot dry season 	<ul style="list-style-type: none"> • Naming of the seasons • Classifying months that fall within each season • Discussing local activities and events done in each season • Listing environmental signs (including indigenous knowledge systems) that indicate seasonal changes • Educational tours • Singing songs, reciting rhymes and poems related to seasons 	<ul style="list-style-type: none"> • Seasonal fruits/ crops • Print media • Recommended textbooks • Resource persons

7.3 GRADE 3 TOPIC 3: SOIL

TOPIC	OBJECTIVES Learners should be able to:	CONTENT	SUGGESTED NOTES AND ACTIVITIES	SUGGESTED RESOURCES
Soil Types	<ul style="list-style-type: none"> • define soil • identify local soils 	<ul style="list-style-type: none"> • Importance of soil • Local soils 	<ul style="list-style-type: none"> • Discussing soil and its importance • Collecting samples of local soils 	<ul style="list-style-type: none"> • Soil samples • Recommended textbooks • Print media • ICT tools
Soil Fertility	<ul style="list-style-type: none"> • identify materials used for making compost • make a compost 	<ul style="list-style-type: none"> • Compost making 	<ul style="list-style-type: none"> • Collecting materials used for making compost • Pegging the site for a compost • Making a compost heap • Maintaining the compost heap 	<ul style="list-style-type: none"> • Protective clothing • Compost making materials such as <ul style="list-style-type: none"> - Soil - Vegetation and animal matter - Water
Soil Erosion	<ul style="list-style-type: none"> • define soil erosion • identify signs of soil erosion in the local environment 	<ul style="list-style-type: none"> • Soil erosion • Signs of soil erosion 	<ul style="list-style-type: none"> • Discussing soil erosion • Educational touring to identify signs of soil erosion in the local environment 	<ul style="list-style-type: none"> • Print media • ICT tools • Local environment

7.4 GRADE 3 TOPIC 4: WATER

TOPIC	OBJECTIVES Learners should be able to:	CONTENT	SUGGESTED NOTES AND ACTIVITIES	SUGGESTED RESOURCES
Water Conservation	<ul style="list-style-type: none"> • state uses of water in agriculture 	<ul style="list-style-type: none"> • Uses of water in agriculture 	<ul style="list-style-type: none"> • Listing uses of water in agriculture • Demonstrating use of water in agriculture such as irrigating, cleaning garden tools, watering animals 	<ul style="list-style-type: none"> • Watering cans • Hosepipes • Safe water • Garden tools • Print media • Recommended textbooks

7.5 GRADE 3 TOPIC 5: PLANTS

14

TOPIC	OBJECTIVES Learners should be able to:	CONTENT	SUGGESTED NOTES AND ACTIVITIES	SUGGESTED RESOURCES
Introduction to the study of plants	<ul style="list-style-type: none"> identify plants within the local environment 	<ul style="list-style-type: none"> Plants within the local environment 	<ul style="list-style-type: none"> Naming the plants Collecting plant samples Educational touring to identify plants Labelling plants such as trees Project on plants in the local environment 	<ul style="list-style-type: none"> Plants in the local environment ICT tools Resource person(s) such as local elders and Forestry Commission officers Recommended textbooks

Paper	Description	Weighting for general paper %
1	Multiple Choice	35
2	Structured questions	30
3	Continuous assessment	35

Continuous assessment will be done as follows:

Assessment mode	Weighting	Assessment Frequency
Project Portfolio	10%	Once per year/ per grade
Psychomotor skills	10%	Once per term/ per grade
Theory tests	10%	Twice per term/ per Grade
Practical diary	5%	Every time a practical is carried out and the recordings are averaged to the stated weighting

Assessment

Candidates are going to sit for the following papers namely:

Paper 1: multiple choice

Paper 2: structured paper

PAPER	TYPE OF PAPER	DURATION	WEIGHTING
1	Multiple Choice	1 Hour	35
2	Structured Paper	2 Hours	30

PAPER 1

This is a multiple choice paper consisting of 50 questions. The paper is marked our of 50 and then weighted to 25%

PAPER 2

This is a structured short answer type paper. This Paper is marked out of 50. It consist of two sections namely Section A and Section B

Section A

Consist of 6 compulsory short questions from key concepts of the syllabus, each question carries five marks. Section total is 30 marks.

Section B

Four questions are set from key concepts of the syllabus. Candidates answer 2 questions. Each questions carries 10 marks. Section total is 20 marks.

Specification grid

SKILL	OBJECTIVES	WEIGHTING %	ASSESSMENT COMPONENT
Knowledge with understand	1	55	1& 2
Application of knowledge	2	35	1& 2
Problem solving	3	10	1& 2
TOTAL		100

6.4	4	1		5
6.5	3	3	1	7
6.6	3	2	1	6
6.7	3	2		5
6.8	3	2	1	5
Total marks per skill	28	17	5	50

Candidates are required to sit for two written papers of Agriculture and a project portfolio should be submitted for assessment.

10. APPENDIX 1

BASIC FARM TOOLS PER CLASS OF 40

ITEM	QUANTITY	ITEM	QUANTITY
Hoes	40	Watering buckets	20
Rakes	10	Tape measures	1
Shovels	10	Slashes	40
Spades	10	Sickles	40
Garden forks	10	Garden dibber	40
Hand forks	15	Claw hammer	2
Garden trowel	5	Pliers	2
Watering can	40	Secateur	5
Wheel barrow	1	Hand axe	5
Mattock	2	Bow saw	2
Pick	2	Garden line	1 x 100m
Hose pipe	1 x 100m	50 kg measuring scale	1

PROPOSED COMPONENTS OF THE PRACTICAL BOOK (DIARY)

The diary should be written in first person narration. For example, "I used a hoe to dig"

DATE: The date on which the practical activity was done should be recorded. For example 06 December 2008

TASK: Write the topic of the practical work done. For example; Weeding nursery. The topic should summarise what was done during practical work.

TOOLS USED: on this part, the learner records the tools s/he used during the practical work. For example; hand fork and dibber/ sticks

WORK DONE:

On this section of the diary, the learner records the actual activities s/he has done. Some may want to refer to it as What I did, Activities or Steps taken. All is acceptable as long as it brings out what the learner did during the practical. For example, if the practical was weeding, the following could be the activities done;

- I took a hand fork/ dibber
- I used it to lightly dig the nursery bed
- I removed the weed by hands
- Some weeds were too close to the seedling, I up-rooted them by hands
- I picked all stones that were in the bed
- I mended the ridges after weeding

WHAT I LEARNT:

some may prefer to call it "what I observed", it will still be acceptable as long as it is a record of what the learner learnt and observed during the practical activity. For example;

- I learnt that removing weeds by a hand fork is easy because the hand fork is light
- I learnt that removing weeds by a hand fork loosens the soil and allows air to get in
- I learnt that if I dig too deep, I will up-root the seedlings
- If I re-ridge, water will not spill from the bed
- There were many weeds in the bed such as the black jack.

ASSESSMENT OF THE PRACTICAL BOOK (DIARY)

TASK	1
TOOLS USED	2
WORK DONE	4
WHAT I LEARNT	3
TOTAL	10
